1,8 € / month per user

ADVANTAGES

Automates, simplifies and protects your company's backups

YOUR CHOICE:

You can choose the replication support that suits you best: Tapes or NAS on-premises, in our cloud, or in both.

SUPPORT 24x7:

We have everything: configuration, training, implementation, daily monitoring of backups and periodic reports and response in case of problems. In addition, our highly qualified and upcoming technical service will support you 24x7 in the most

PARTNERS:

We are Cloud & Service Provider Platinum from Veeam, and partners from Ahsay to offer you with full support the best solutions in virtual environments, both local and in the cloud.

FOR SMEs:

Solutions designed for office environments, from the simplest to the most professional, SMEs or Local Public Administrations, where the volume of data, the complexity of the infrastructure and its impact on response times are a challenge. We have scalable solutions that are adaptable to every need.

TAILORED TO YOUR COMPANY:

Don't worry about licenses, technologies, and backup tools. Our solution takes care of everything (hardware, software and services) tailored to your needs and with the most efficient backup engine for you.

CONNECTIVITY INCLUDED:

The advantages of having a global provider: Hire your g-Backup for more than 5 servers and we offer the conectividade(FTTH 250Mb).

SAFE AND SCALABLE:

With all the guarantees required by the General Data Protection Regulation. A simple, fast and 100% secure solution that you can add to our Gigas Recovery service.

IMMUTABLE REPOSITORY:

Add to your premium g-Backup the advantages of working with an Immutable Veeam repository, a solution that allows you to make storage where the backup is stored cannot be modified even by Veeam himself.

Choose the backup solution that best suits your needs
